I come, I see, I'll conquer.

Writing 1

(1) According to the chart, we can see that the smartphone share of domestically produced mobile phones increases by 32.5% from the year 2012 to 2017. The smartphone share of Huawei tops the list among all brands, domestic or overseas.

(2) For this there are a host of reasons that cannot be neglected. Firstly, the domestically produced mobile phone companies are pursuing innovation in their technologies, which can boost a great improvement in the quality and features of their products. Secondly, though the quality of homemade smartphones is greatly promoted, their price is not high as opposed to foreign brands. _____.

(3) To sum up, stimulated by the support of customers, homemade smartphone companies have made more efforts to produce smartphones equipped with more excellent functions, better quality as well as more exquisite appearance, and in return, they naturally attract more customers. With all the advantages of domestically produced mobile phones shown above, it is certain that homemade smartphones will embrace a bright future.

I come, I see, I'll conquer.

Writing 2

(1) As is illustrated in all graphs, great achievements have been made as regards environment and people's livelihood. Specifically, statistics shed light on the progress in the sectors of green areas, park land areas per capita, minimum wages for workers, average life expectancy and the like.

(2) With the improvement in the environment and people's livelihood, our living standards have been considerably raised.

In addition, people are supposed to live a better life with the safety net mainly supported by the government. Those who are underprivileged will be assisted while the elderly can enjoy their lives in the nursing homes. Last but not least, it is easier for kids to access good education because of the financial investment in education.

(3) To summarize, the data in the chart objectively mirror the picture in the society. The progress achieved in environment and people's livelihood is of great significance. It is certain that, in the foreseeable future, the government will continue to make efforts to improve the two sectors for the prosperity of the country.

I come, I see, I'll conquer.

Writing 3

(1) According to the information conveyed in the chart, we can clearly see that the year 2012 to 2016 have witnessed the increase in the number of students studying abroad as well as overseas returnees. To be exact, the former grew from 3.996 million to 5.445 million, but the latter from 2.729 million to 4.325 million. Obviously, the number of overseas returnees accounts for 70% of the total returnees after the 18th National Congress of the Communist Party of China, and has reached 2.6511 million by the end of 2016 which is almost more than half of the accumulative number of students studying abroad for these years.

(2)

More and more families are able to support their children to study abroad, through which students can benefit from a different educational system and can broaden their horizon. In the meantime, attracted by the good economic prospects of their native country, more and more overseas students have returned so as to pursue entrepreneurial or professional opportunities.

(3) Undoubtedly, the robust economic momentum of China is unlikely to fade away. And it is predictable that, in the future, China will continue to see the rising study abroad craze as well as the returning boom.

I come, I see, I'll conquer.

Writing 4

(1) According to the information conveyed in the chart, we can clearly see that the forest protection has made great progress. During the five years from the ending year of the Eleventh Five-Year Plan to the ending year of the Twelfth Five-Year Plan, the forest coverage has risen from the 18.03 percent to 20.50 percent, with the number of natural reserves reaching 45, forest parks 134, and desert parks and wetland parks also on the rise.

(2) Several reasons may account for this phenomenon. Recent years have witnessed a significant improvement in people's livelihood, along with which the awareness of the health and the needs for a livable environment increased accordingly. At the same time, however, some wild animals are facing the threat of extinction due to their decaying habitats. _____

(3) Undoubtedly, what has been mentioned above reinforces the importance of forestry. Therefore, we may reasonably arrive at the conclusion that in the future, China will continue to make efforts to intensify the protection of forest coverage.

I come, I see, I'll conquer.

Writing 5

(1) Rapid development in express delivery industry is on the way as we are moving into an era featuring growing E-commerce. This is most vividly reflected in the bar chart above. The five years from 2012 to 2016 have witnessed the dramatic rise in the number of parcels and the revenue of express industry, with the former rising from 5.69 billion to 31.28 billion, while the latter from 105.5 billion yuan to 397.4 billion yuan during the same period.

(2) There are several reasons behind the landscape as revealed in the chart above. To begin with, the rise of E-commerce has brought about radical changes in consumer market. Covering shops around the country even the world, E-commercial platforms are populated with an array of goods. _____

Additionally, people's living standards have witnessed a significant improvement in recent years. Therefore, attracted by goods in excellent pictures, few people would resist the temptation of the attractive on-line shopping service.

(3) Anyway, although there is a growing concern over the threat of packaging wastes posed to the environment, the robust momentum of express industry is unlikely to decline. Moreover, it can be predicted that, express industry still has many challenges to overcome unless figuring out how to well tackle with the waste.

I come, I see, I'll conquer.

Writing 6

(1) According to the chart, we can see that the past 10 years have witnessed great leaps forward in nurseries and kindergartens in China. The number of preschool enrollment in 2012 was ..., but the number has reached an all-time high in

(2) Several reasons may account for the above-mentioned profile. Firstly, pre-schooling can meet the kids' developmental demand. As kids in nurseries and kindergartens are in the critical stage of transitions, pre-school education could help them create an attachment to places and people outside their family and then learn the art of self-reliance. Secondly, pre-schooling helps equip children with the elemental skills for their survival.

(3) Compared with the children who do not attend any preschooling service, those who do enter primary schools are equipped with better social skills and more adaptability. There is no doubt that preschool experience is an once-and-for-all opportunity that cannot be missed out. Predictably, the following years will continue to see the growing numbers of preschooling enrollment.
